

We offer a fun, educational experience for children and adults of all ages in the community to learn about Sustainable Energy & Living Practices.

Our "Interactive Trailer" is used which has a fully operational Solar Electric and computerised monitoring system on board. The unit operates totally from solar power. Contained within are several large LCD flat screen TV's rigged up to show educational DVD's, PowerPoint training slides and graphical presentation software which shows consumption of typical household electrical devices and the generation of power from the solar panels in a live on-line manner.

The Topics we cover are:

- What do my household lights and appliances typically use?
- Ideas to reduce power consumption.
- Enviro Building considerations
- Generating power from the Sun and Wind.
- Being Waterwise – Greywater recycle systems & smart irrigation
- Heating and Cooling, water and space heating.

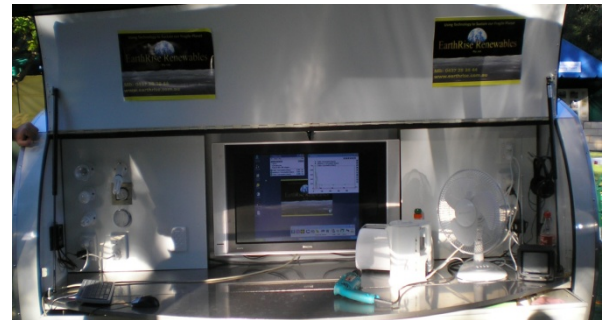

Logistics:

The talks can be structured to suit your time requirements but ideally are comprised of:

- 10min Talk.
- 15 min Interactive demonstration allowing participants involvement.
- 5 min DVD presentation.
- 5 min Windup talk to recap & informal test.
- Total time approx: 35-45 mins

Ideal group size should be no more than 15 at a time, for larger groups than this we can split into two, one doing DVD & talk while the other group is involved with the demonstration.

Background on our business:

We formed to assist the residential and commercial sectors on how they can "Do their bit" and "Save the Planet" through a consultative process using energy audit techniques. It became evident that using our equipment and knowledge we could offer an educational service to schools and community groups as well. If any of these groups wished to apply the techniques, particularly the generation and implementation of solar electricity, heating and Grey-water recycling systems we can design and install for them as a follow-up to the talks. However, the talks are not used as a "sales pitch" but an educational awareness program for the community.

What to do next?

Please contact us on the numbers below or via the on-line form on our website and we will discuss further the opportunity and schedule time that suits your needs. As we are a commercial business we shall request a modest charge for this service.
